

## **CAD/BIM Track at 2007 Infrastructure Systems Conference**

By James T. Wilson, *CADD/GIS Technology Center*

The Detroit Marriott Renaissance Center is your 2007 venue to see the latest in CAD and BIM technologies. Sponsored by the US Army Corps of Engineers, the Infrastructure Systems Conference (ISC) 2007 could not be more appropriate for a gathering of CAD and BIM users.

We are contacting you in the hopes that you (or someone in your office) will submit a CAD-, BIM-, or collaborative engineering-based abstract for inclusion in the ISC's CAD/BIM track or in one of the many other technical sessions. The CAD/BIM track for this year's conference is hosted by the USACE CAD and BIM Community of Practice and the CADD/GIS Technology Center. If you are developing BIM design projects, deploying ProjectWise, integrating BIM and GIS, using 3D in facility management, or using CAD and BIM in a way you feel would be of interest to the attendees of the ISC, we ask that you please consider submitting an abstract.

To register, submit a paper, or just learn more about the June 25-29 Conference, please visit the ISC website at [www.usaceiscconf.org](http://www.usaceiscconf.org). The Call-for-Abstracts is open to Corps of Engineers personnel, personnel from other agencies, and consultants. Please distribute this announcement to everyone interested in CAD and BIM technologies. Hope to see you there!
